Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 32, 33, 36, 40, 43 , and 44 are rejected under 35 U.S.C. 102(b) as being anticipated by Roy et al ('173).

Roy discloses the use of a flat panel sound radiator for a ceiling grid (see the abstract) comprising a frame, a flat panel radiator disposed within the frame (200); an electromechanical transducer (706) for inducing motion to the flat panel radiator to reproduce an audio signal supplied to the transducer; a bridge attached to the frame and providing a mounting surface for electromechanical transducer (see figure 3); and an isolation element with two parts (see figure2) for supporting and isolating the flat panel radiator from the frame thereby enabling the flat panel radiator to vibrate and to slide laterally in response to motion induced by the audio signal supplied to the electromechanical transducer (see figure 4). Roy also discloses the use of a bridge that spans a length of the flat panel radiator on a back surface of the radiator and provides the sole support for the transducer (see figure 8). Roy also discloses the use of a voice coil (202) and a magnet (201).

3. Claims 1-31, 34, 35, 37-39, 41, 42, 45, and 46 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in
